Leonardo Academy prepares whitepapers on the economics of LEED for Existing Buildings (LEED-EB) based on periodic surveys on the costs and benefits of LEED for Existing buildings (LEED-EB).

These surveys gather information on:

1. Ongoing operating cost data for LEED-EB certified buildings and
2. Initial LEED-EB implementation cost data for buildings

The 2009 Survey of the Economics of LEED-EB is underway. If you are the owner or manager of a LEED-EB certified building please contact Leonardo Academy to participate in the 2009 survey.
