

#### Building Certification

##### Earn a LEED-EB Credit

Cleaner & Greener® Certification can help your building earn one credit toward Leadership in Energy and Environmental Design for Existing Buildings (LEED-EB®) status through the U.S. Green Building Council's certification program. Buildings participating in Cleaner and Greener can achieve LEED-EB Energy and Atmosphere Credit 5.4 by documenting the emission reduction benefits of building efficiency actions, retiring a portion of the reductions and requesting that their suppliers do the same.

**We help companies and organizations,** families and individuals reduce air pollution that contributes to climate change and adversely affects both human and environmental health. We help quantify your emissions footprint, develop strategies for reducing your environmental impact through emissions reductions and offset purchases, and provide Cleaner & Greener® certification for the level of emission reductions and offsets achieved.

#### Event Certification

The Cleaner & Greener Program helps event organizers quantify, reduce, and offset emissions caused by event activities and to earn Cleaner & Greener certification. We calculate emissions resulting from travel to and from the event, event space energy use, lodging, and meals. We work with the event host to offset these emissions to the level that they choose. Events are certified Cleaner & Greener by Leonardo Academy and recognized for the level of emission reductions and offsets achieved.

#### Company and Organization Certification

The Cleaner & Greener Program helps companies and organizations lead the way to a cleaner, greener, and healthier environment. We quantify your emissions footprint, calculate emission reductions from energy efficiency and other emission reduction projects, offset these emissions, and certify the level of emission reductions and offsets achieved.

Cleaner & Greener certification can help you—whether you represent a business, government office, or other organization—communicate to the public that you are taking action to reduce pollution that contributes to climate change, smog, and acid rain. The program recognizes your company or organization for its environmental stewardship by rewarding the emission reduction benefits of energy efficiency and renewable energy.

#### Sustainable Living for Families and Individuals

The Cleaner & Greener Program also helps families and individuals reduce their environmental footprint and to live more sustainably by reducing and offsetting emissions created by home energy use, transportation and lifestyle activities.
