

Leonardo Academy is a 501(c)(3) non-profit organization founded in 1997 dedicated to advancing sustainability and putting the competitive market to work on improving the environment.

Leonardo Academy is a Think Tank that drives its vision into practice. We develop and distribute strategies, guidance, metrics, standards, education, and information on how to increase sustainability. We also help companies, organizations, families, and individuals successfully promote, encourage, and implement sustainability.

Our integrated approach makes environmental sustainability very practical to our clients.

Sustainability strategies yield greater benefits that make good business sense.

Leonardo Academy provides a comprehensive approach to economic, social and environmental sustainability.

Leonardo Academy provides consulting services to companies and organizations to help them increase their sustainability. Leonardo Academy knows that careful investment in sustainable practices pays—whether it's in how you construct and operate your buildings, how you manage your operations, or how you produce your product.

We've seen it time and time again.

Leonardo Academy services include:

LEED® Consulting Services

Leonardo Academy helps building owners and managers implement LEED in their buildings. We assist with strategy development, education, training, implementation, documentation of achievements, and LEED implementation and application preparation. This consulting support is provided for all of the U.S. Green Building Council's LEED Rating Systems.

Corporate Sustainability and Emission Footprint Assessments/Strategies

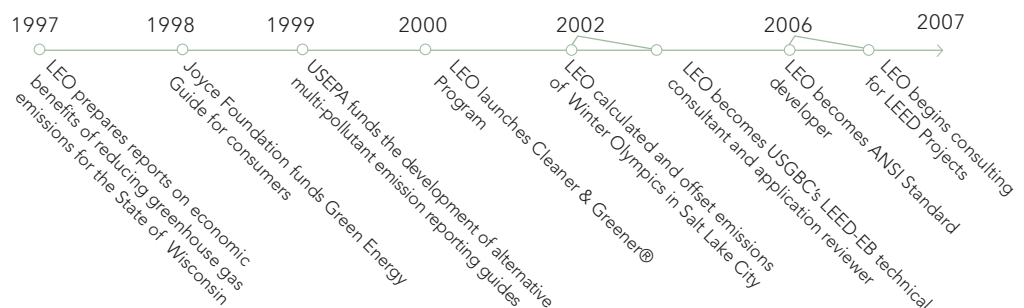

Leonardo Academy provides services that help companies and organizations understand, quantify and manage their overall sustainability and emissions footprint. Leonardo Academy helps companies and organizations develop and implement sustainability strategies that make environmental and economic sense from emissions, to procurement, to products and corporate operations.

Cleaner & Greener®

Leonardo Academy's Cleaner & Greener® Program provides certification of the level of emission reductions and offsets achieved by a company, organization, family, or individual. We also work with event organizers to quantify, reduce and offset emissions caused by events including emissions from event space energy use as well as participant travel, lodging and meals.

Our History in Sustainability

Leonardo Academy has been an expert in sustainability from the beginning.

Additional services and programs we offer:

Sustainable Land Management

Leonardo Academy assists landowners in developing and implementing plans for sustainable land management, restoration and preservation. Our services include site assessments, consulting for management, restoration and preservation activities including plant species inventory, prescribed burning, brush and exotic species control, seed collection, prairie planting, tree planting and other actions. We assist landowners in identifying and applying for resources available to support these activities.

Certification Standard Development

Leonardo Academy is an ANSI-accredited standard developer and is currently developing a standard for quantifying emission inventories, reduction credits and offsets.

Greening Your Campus Building Portfolio

Leonardo Academy supports the implementation of LEED-EB for college, university and corporate campus building portfolios.

Green Procurement

Leonardo Academy helps companies and organizations develop, implement and track achievements of green procurement programs.

Sustainable Living for Families and Individuals

Leonardo Academy provides a free guide to families and individuals on how to live more sustainably, including tips on operating homes, vehicles and maintaining yards with reduced environmental impacts. We also help families and individuals offset emissions caused by their homes, transportation, and lifestyles.

Accelerating Green Seminars

Designed to accelerate understanding and expertise in green building and sustainability, the content of these seminars is tailored to address the green issues that are important to the organizations that host or sponsor the seminars. Popular seminar topics include green facility management, green building, green cleaning and green marketing.

Training and Education

Leonardo Academy provides training and education on sustainability, LEED®, green building management, performance contracting and other topics. Training is offered in person and online. Leonardo Academy staff are frequent speakers on sustainability, environmental emissions, green buildings and LEED at public and private events.

Leonardo Academy is proud to be a member of the following organizations:
