Sustainability strategies for organizational success.

Sustainability goes beyond the traditional business goal of profit to include improving the environment and the well being of people. Leonardo Academy's approach focuses on people, planet and prosperity, often referred to as the "triple bottom line."

Leonardo Academy provides services that help companies and organizations understand, quantify and communicate their overall sustainability and their emissions footprints. We help clients use the synergies of sustainability to drive corporate success and create new business models that integrate sustainability into day-to-day "business as usual" operations.

Organizational sustainability is increasing in importance as major buyers of goods and services begin to consider supplier sustainability achievements in procurement decisions.

Leonardo Academy services include:

Overall sustainability assessments and strategies

- Quantification and tracking of overall sustainability, taking into consideration the three cornerstones:
 1. **Environmental Impacts**, including: Emissions Footprints, Building Portfolios, Transportation, Resource Use, Procurement and Supply Chain, and Waste Management
 2. **Social Impacts**, considering: Employees, Customers, Communities and Global Impact
 3. **Economic Prosperity** as it relates to: Employees, Customers, Communities and the Corporation
- Development and Implementation of strategies for increasing sustainability

Emissions Footprint Assessments and Strategies

- Quantification and tracking of emissions footprints—Leonardo Academy addresses both greenhouse gases and emissions that are detrimental to health
- Development and implementation of reduction and offset strategies

Experience With Sustainability and Emission Issues

Leonardo Academy's staff have over two decades of experience with sustainability and emissions issues. We have developed extensive white papers addressing these issues. Visit our website's report section for a comprehensive sampling of our experience.
