**Message From the President**

It has been a very productive year for Leonardo Academy as we continue to help drive sustainability into practice on many fronts. We have embraced new industries for buildings, organizations, agriculture, emissions, gaming equipment, fire suppression, land management and more.

We have greatly expanded our training program to provide the practical knowledge to empower the legions to advance sustainability. We now offer 21 in-person public training programs across the country, 19 live training webinars, and begin to offer on-demand webinars.

As a charitable non-profit organization our mission is to develop new approaches of sustainability and then work to drive them. It has been an incredible year advancing our mission but an incredible amount of work on moving the world toward sustainability remains for all of us.

As 2011 approaches, please consider making a year-end charitable contribution to Leonardo Academy to support our work on advancing sustainability. You can make your contribution online at: [www.leonardoacademy.org/donate.html](http://www.leonardoacademy.org/donate.html)
