Message From the Pre
We are off to a great start in 2012! The National Sustainable Agriculture Standard subcommittees are working diligently to complete the Draft Standard by April 24-25 in Washington, DC. This significant milestone represents years of hard work and perseverance by the members of the standards committee and subcommittees who all participate on a volunteer basis.

Leonardo Academy’s Sustainable Transportation Program was awarded a $900,000 grant from the Environmental Protection Agency to develop a clean diesel solution for Midwest fleets. The project will be implemented in Wisconsin and Illinois, so we are excited about the prospect of expanding this far-reaching program across the nation.

Leonardo Academy Press Releases from January

Monday, January 25:
