This is the 2008 edition of Leonardo Academy’s annual white paper on the Economics of LEED for Existing Buildings (LEED-EB) for Individual Buildings.

This white paper was prepared to answer two important questions: What are the costs of implementing LEED for Existing Buildings? How do the operating costs of LEED-EB certified buildings compare with the other buildings?

Please contact Leonardo Academy if you have any questions, comments, or suggestions for this white paper. Contact Information: Leonardo Academy Inc. Tel: 608-280-0255
