

Leonardo Academy works to reduce all types of emissions including both the greenhouse gas emissions that are harmful to the climate and the emissions that are harmful to human health. We need to address the issue of climate change as well as be able to breathe the air.

Program Activities:

- Leonardo Academy is developing an ANSI standard for Emissions Inventory, Reduction Credits and Offsets
 - See [Leonardo Academy Standard Development Program web page](#)

- Training
 - Leonardo Academy provides a full range of emissions training courses:
 - In person
 - Webinars
 - On demand

- For a listing of the courses see our [Training Program](#)

- Leonardo Academy Tools and Resources
 - Emission Factors for Emissions Calculations for electricity in each state and for other fuels
 - Cleaner and Greener® Certification Program® for:
 - [Buildings](#)
 - [Events](#)
 - [Organizations](#)

See the Leonardo Academy [Emissions Consulting services web page](#)
