2011

- August 9, 2011 -- The American National Standard (LEO-5000) for Emissions Inventories, Offsets, and Reduction Credits standard was approved as an American National Standard by ANSI on August 9, 2011. This standard was developed under the rules of the American National Standards Institute (ANSI). The ANSI standard development requirements provide for an open, balanced and transparent standards-setting process that is internationally recognized.

2010

- May 24, 2010 -- Leonardo Academy announces a call for applications for three open seats on the Emissions Inventories, Offsets and Reduction Credits Standard Committee. Any individual or representative of an entity that produces or creates emissions, inventories its emissions, offset its emissions, reduces or sequesters emissions or creates emissions offsets or reduction credits is encouraged to apply. Likewise, representatives of environmental and governmental organizations, consumer groups, labor groups and academia are all all welcomed to submit and application for committee membership.
