

### **Grants for Transportation and Engine Emissions Reduction Actions**

Leonardo Academy helps owners reduce emissions by identifying applicable grant opportunities, preparing and submitting grant applications, and administering the [implementation of these grants](#)

### **Compliance Requirements and Voluntary Initiatives**

Leonardo Academy will compile information from regulatory agencies that govern vehicle transportation and logistics. Information may include but is not limited to anti-idling laws, emission regulations, as well as air quality goals for specific states or jurisdictions.

### **Emission Reduction Technologies**

Leonardo Academy researches available California Air and Resources Board (CARB) or EPA-verified emission reduction technologies that address both *SmartWay* Transport Partnership strategies and the objectives of our partners.

### **Financing**

Leonardo Academy facilitates fleets with specific financing options to purchase, upgrade and/or install new technologies. Financing may include leases, purchases, lease guarantees, grants, tax credits and manufacturer rebates. We strive to match customers with optimal financing solutions based on location and operations type.

### **Installation Contracting & Coordination**

Leonardo Academy coordinates installation with qualified vendors and installers for leased equipment. Leonardo Academy requires quality workmanship and manufacturer certification of participating installers.

### **Administration, Monitoring, Testing, Certification & Reporting**

Leonardo Academy verifies the use and operation after the sale to ensure program objectives and grant requirements are met.

### **Cleaner and Greener® Sustainable Transportation Recognition Program**

This program recognizes voluntary efforts and strategies by fleet operators and organizations that actively seek to reduce the emissions from their diesel vehicles and equipment. For more information visit: [www.cleanerandgreener.org](http://www.cleanerandgreener.org)
